

What is Higgsfield AI?

- AI video tool that generates cinematic content from photos or prompts
- Adds motion, effects, and cinematic quality automatically
- No video editing skills or expensive equipment required
- Designed for social media, ads, and marketing content
- Used by small businesses, creators, and marketing teams

What problems does Higgsfield AI Solve?

Static photos that get low engagement on social media

No time or budget to hire a videographer or editor

Struggling to create consistent video content regularly

Videos that look unprofessional compared to bigger brands

Slow content creation that can't keep up with posting demands

How Does Higgsfield Work?

- **Upload a photo or frame** — start with any image from your phone or camera
- **Type a prompt or pick a style** — choose cinematic effects or describe what you want
- **AI generates the video** — motion and effects are added automatically in seconds
- **Preview and adjust** — tweak the output before downloading
- **Download and post anywhere** — ready for Instagram, TikTok, Facebook, and more

Specific Use Cases and Examples

Real Estate Agent

- Turn listing photos into cinematic property walkthrough videos
- Create neighborhood highlight reels for social media
- Stand out from other agents with professional video content
- No editing skills or videographer needed

Boutique / Retail Shop

- Animate product photos into eye-catching promotional videos
- Create seasonal campaign content in minutes
- Post consistently without needing a content team
- Drive more engagement with videos that stop the scroll

Restaurant Owner

- Turn food photos into cinematic menu highlight videos
- Create atmosphere reels to attract new customers
- Promote daily specials and events with quick video content
- Build a stronger social presence without extra staff
